

Megan Kelly Bio

Megan Kelly began her roots in small town country Victoria, Mliawa. From the tender age of 12, with guitar in hand, this country gal put words to paper creating lyrics expected only from an old soul.

In years to follow The Megan Kelly Gang was formed and the band travelled across this great vast land from the snowy high country to the steamy remote Territory. In 2011, at the prestigious Tamworth Country Music Festival The Megan Kelly Gang took home runners up in the battle of the bands and from this the gang found themselves sharing the stage with the likes of the Wolfe Brothers, The McClymonts and Travis Sinclair

At 21 Megan left her hometown of Milawa to pursue a career in the mining industry in Western Australia, from her new found home in a caravan she set out to achieve her long term dream of travelling to Nashville Tennessee. At 23 Megan's desire to learn more about her love of country music and possibility to belt out a tune at the infamous Tootsies Bar became reality when she travelled to Nashville.

For such a young life Megan has been through more than her share of 'Life Experiences' which saw her put down her beloved guitar and face some of her biggest challenges to date. But from these challenges Megan has emerged bruised but not beaten and what she has taken away from it now resonates in her voice, heartache, strength and raw emotion. Megan sings purely for the love of country music and its ability to warm the souls of many.
