

- NOTES:
1. All sign locations shall be checked prior to set out and positions adjusted to allow for specific site constraints such as vegetation, other signs, roadside furniture and sufficient space on shoulder/emergency lanes.
 2. Min road width = 6m
 3. Max cone spacing = 4m
 4. Ensure that existing permanent signage within the extent of the site is covered for the duration of the daily works. Remove covers on completion of works each day.
 5. Delineation shall be offset 0.5m from trafficable lane.
 6. Once the road has been reinstated all signs and devices shall be removed upon the completion of works.
 7. If works are carried out in a school zone, the reinstatement speed to be 40kph during school times.

IMPORTANT NOTE

Implementation of this TGS must be supported with a site inspection form & risk assessment, refer to section 4 in the Traffic Management Plan.

This is a diagram only and must be reviewed and modified if necessary, for each specific site. Evidence of review and modifications must be by an AWTM or WTM accredited person and must be recorded on appropriate documentation.
